

MITCHELL LANGLEY

Infrastructure · Project Finance · Regulatory & Permitting
Santiago, Chile · +56 9 8776 6277 · mitch@mitchlangley.cl · linkedin.com/in/mklangley

Professional Summary

Bilingual consultant with 12 years working across the structuring, financing, and regulatory approval of infrastructure projects in Chile and the United States, across transportation, energy, and telecommunications. Spent four years at a national transportation regulatory agency, drafting and evaluating public procurement documents and later advising the operators it oversees. Subsequently built a nationwide advisory practice managing a portfolio of infrastructure clients. Works across three perspectives: the regulator deciding on funding, the financier evaluating risk, and the operator defining its capital investment requirements. Postgraduate training spans regulatory law, competition and antitrust, and administrative litigation, paired with hands-on land-use, zoning, and permitting work. Writes and communicates fluently in English and Spanish on legal, regulatory, and public-sector matters.

Core Competencies

Infrastructure & Project Finance

Public Procurement, Proposal Evaluation & Bid Management · DBFOM & Public-Private Financing · CAPEX/OPEX Modeling, Sensitivity Analysis & Bankability Assessment · Concession, Subsidy & Availability-Payment Structures

Regulatory & Permitting

Regulatory Law & Administrative Proceedings · Land-Use & Zoning Feasibility · Site Control, Permitting Risk & GIS-Based Site Screening

Institutional & Oversight

Government Relations & Multi-Stakeholder Coordination · Portfolio Monitoring & Compliance Oversight

Professional Experience

Partner & Consultant

Mitchell Langley Advisory / Langley & Villalobos Advisory Ltd. · Chile · 2023-Present

- **Client Advisory & Deal Structuring:** Advise 15+ clients across Chile in the transit, energy, telecommunications, and legal sectors on project structuring, subsidy optimization, and regulatory compliance for regulated operations and electric bus and charging infrastructure. Administer disbursement of 247,650 Chilean UF (USD 11.1 million) in annual subsidies for seven transit clients, allocating ministry transfers to individual owner-operators.
- **Financial Modeling & Due Diligence:** Build project-finance models covering the full contract term for DBFOM structures, incorporating multiple sensitivity scenarios, debt-service and loan-life coverage ratios, and tools for calculating break-even prices, and lead technical and financial due diligence for lenders, investors, and operators. 1,621,270 Chilean UF (USD 68.5 million) in fleet and depot acquisition cost; 2,365,878 Chilean UF (USD 100 million) in total scheduled lease payments; led due diligence responses for USD 63 million of that total.
- **Site Feasibility & Permitting:** Evaluate site control and permitting risks prior to capital deployment, using GIS to screen sites against zoning requirements while reviewing property ownership and occupancy rights, title encumbrances, environmental overlays, and utility interconnection.
- **Tenders & Regulatory Representation:** Manage public procurement bids from preparation through submission and act as formally designated authorized representative (apoderado) for operators in 50+ administrative proceedings (descargos & recursos de reposición) and 250+ formal inquiries before sector regulators.
- **Stakeholder Negotiation & Analytics:** Mediate between public agencies and private operators to resolve obstacles to regulatory approval; build automated dashboards and AI-supported tools to streamline monitoring and evaluation.

Urban Development Coordinator, Regional Public Transit Division

Ministry of Transportation and Telecommunications · Santiago, Chile · 2022-2023

- **Portfolio Oversight & Governance:** Directed regulatory oversight and portfolio governance for 15+ transit concessionaires receiving more than USD 35 million in annual subsidies across four southern regions.
- **Tender Drafting & Evaluation:** Drafted and evaluated public procurement documents for regional transit concessions, reconciling land use, utility capacity, and cross-sector regulatory constraints to make terms technically feasible and legally compliant, and assessed bidder submissions against them.

Infrastructure · Project Finance · Regulatory & Permitting
Santiago, Chile · +56 9 8776 6277 · mitch@mitchlangley.cl · linkedin.com/in/mklangley

- **Regulatory Rulemaking, Rollout & Liaison:** Authored program-specific regulatory rulemaking documents, including coordinating inter- and intra-agency approvals, then led the regulatory and operational rollout of transit programs across the macrozone as principal liaison with regional and local governments and operators.

Urban Development Analyst, Regional Public Transit Division

Ministry of Transportation and Telecommunications · Santiago, Chile · 2019-2022

- **Financial & Operational Analysis:** Conducted financial and operational analysis of regional bus systems, assisted in the development of programs that complied with statutory requirements, and prepared policy briefs and analytical reports for executive review.
- **Data Validation & QC:** Validated operational and regulatory databases and performed quality control on contract amendments and administrative filings.

Assistant Project Manager / Transportation Planner

HNTB · Arlington, VA · 2015-2019

- **Program Management & Stakeholder Coordination:** Coordinated up to 20 stakeholders across multidisciplinary capital transportation infrastructure programs, guiding technical, contractual, and business decisions to keep projects within a USD 300+ million portfolio on track.
- **Traffic Modeling & Simulation:** Developed traffic microsimulation models for highway widening and capacity improvement projects for VDOT, MDOT, PennDOT, and FHWA, and large-scale signal coordination models in Synchro for the South Arlington and DDOT city-wide programs.
- **Traffic & Revenue Analysis:** Developed traffic-and-revenue models for toll-road projects including the Transurban I-95 and I-495 Express Lanes, the MWAA Dulles Toll Road, and the MdTA Intercounty Connector.
- **Regulatory Compliance & FHWA Documentation:** Developed regulatory compliance analyses that shaped infrastructure design and permitting strategy, and contributed to the drafting and internal review of Interchange Modification Reports (IMR), Interchange Justification Reports (IJR), and design waiver requests submitted to FHWA.

Education

Graduate Certificate · Regulatory Law · Universidad Adolfo Ibáñez · Chile

Regulatory theory and economics, competition and antitrust, regulatory litigation, and sectoral regulation of transport, energy, telecommunications, water, and public works concessions.

Graduate Certificate · EV Policy · U. Católica de la Santísima Concepción · Chile

B.A. · Geography & Latin American Studies · George Washington University · Washington, DC

Additional Information

Languages

English (native) and Spanish (native-equivalent), including legal and regulatory communication in both.

Technical

Excel (advanced financial modeling, VBA); Python; SQL and database management (SQL Server, Access, pgAdmin); QGIS and ArcGIS; traffic engineering (Synchro, Vissim, MicroStation).

Status

U.S. citizen and Chilean permanent resident, work-authorized in both countries without sponsorship.
